Declaration from the supplier of TiO_2 pigment

Notes: This declaration is to be filled in by the TiO_2 pigment supplier, but only in cases when the supplier is not the producer. Otherwise, the TiO_2 production declaration shall suffice.

The aim of this declaration is to ensure the traceability of TiO_2 pigments supplied by intermediaries back to the factory of production, so that relevant data to demonstrate compliance with requirements for EU Ecolabel paints can be obtained.

Table 1. Summary of information provided by the declaration.

TiO_2 pigment commercial name *(as sold by the supplier)*	Pigment producer *(company name and contact details)*	Other relevant details, if known *(e.g. the name of pigment supplied directly from producer (if different to the commercial name of the supplied pigment product), type of production process (chlorine/sulphate) and year of purchase)*	Have any substances been added by you to the pigment which have any of these CLP hazard codes: H300, H301, H304, H310, H311, H317, H330, H331, H334, H340, H341, H350, H351, H360, H361, H362, H370, H371, H372, H373, H400, H410, H411, H412, H413? *(if so, please state the name of the substance, its CAS number, the quantity used in the TiO_2 pigment, the associated restricted classifications and any specific concentration limits or M-factors that are relevant to the CLP rule of mixtures)*

(Insert more rows if declaration covers more pigment products/sites/years)

☐ I declare that I will keep the competent body informed in case of any changes to our products or processes which influence the validity of this declaration.

I, the undersigned, hereby declare that all the documents provided to demonstrate the accomplishment with the criteria are true and correspond to reality.
